

Trusted by Design

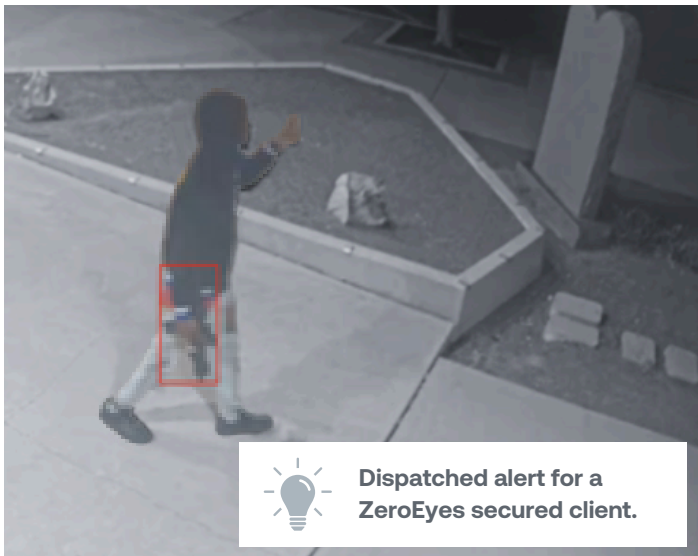

AI-Powered. Human-Driven.

About ZeroEyes

The world's most credible AI gun detection system. Built to perform when seconds matter.

Dispatched alert for a ZeroEyes secured client.

THE PROBLEM

When AI Alone Isn't Enough

AI promises precision, but too often fails under pressure.

Security leaders know that false alarms and missed detections can cause chaos, erode confidence, and put lives at risk.

AI alone shouldn't make life-critical calls.

The problem isn't a lack of technology. It's a lack of **credibility**.

In moments where the stakes are high, no one trusts a machine to make the final call.

OUR SOLUTION

Co-Designed for Trust

ZeroEyes bridges the credibility gap with a system that's engineered for speed, accuracy, and accountability.

Our computer vision identifies visible firearms in real time, and **every alert is verified by a trained analyst in our in-house ZeroEyes Operations Center (ZOC)**. This dual-layer process ensures credible alerts, helps to eliminate false positives, and delivers actionable intelligence directly to first responders in seconds.

Our AI model is continuously refined through specialized optimizations for small-object detection, rigorous post-training analysis, and our unique annotation process—all powered by proprietary data we collect and own. This disciplined approach strengthens performance where it matters most: in real-world, high-stakes environments.

Meet the Humans Behind the AI

At the heart of ZeroEyes is our team of **U.S. military and law enforcement veterans and expert analysts**, staffing the ZOC 24/7. They're the human backbone of our technology, ensuring that every alert is verified, every second is used wisely, and every response is credible.

MEET JESSE DECZYNSKI

Jesse served as an Air Traffic Controller in the U.S. Air Force, where managing high-pressure airspaces taught him calm precision, discipline, teamwork, and attention to detail.

Why Credibility Matters

Lives, reputations, and response times depend on trust.

That's why ZeroEyes **co-designed** machine precision with human judgment, ensuring the most credible, real-world gun detection system available. From commercial properties to schools to military bases, our customers know they can depend on us when every second counts.

Trusted by Leaders Who Protect Lives

Trusted by schools, the DoD, Fortune 500 Companies, and more...

The Trust Standard in AI Safety

ZeroEyes was built on a simple belief: **trust is earned by people, strengthened by process, and measured in performance.**

When the stakes are highest, choose a system that's trusted by design.

"FSW is leading the charge in innovative security technology to ensure the safety of our community, and ZeroEyes plays a crucial role."

ZeroEyes can proactively identify and alert us to a gun-related threat before any shots are fired, expediting emergency response and potentially saving lives."

— Jerry Connolly,
Chief of Police,
Florida SouthWestern (FSW) State College
